Tally: Personal Finance Tracker **May 2026 – Present**

tally-issac.vercel.app | github.com/issac-23/tally | *TypeScript*, *Next.js*, *React*, *PostgreSQL*, *Supabase*, *Vitest*

- Wrote 259 Vitest tests that caught a UTC timezone defect in the runway math and category totals
- Shipped a full-stack Next.js and React app across 65 merged pull requests and 184 commits
- Secured per-user data with Postgres Row Level Security policies behind Google OAuth
- Projected a 12-month savings runway and 30-day comparison by category and merchant

DCF Valuation Model **May 2026 – Present**

dcf-calculator-issac.streamlit.app | github.com/issac-23/dcf-calculator | *Python*, *pandas*, *Streamlit*, *Plotly*

- Built a Python pipeline that derives 6 valuation assumptions from a ticker's 4 years of filings
- Wrote a reverse DCF that solves for market-implied growth: ~36% for Apple vs. a 1.8% 4-year average
- Added checks that flag empty, NaN, and implausible filing data before it reaches the model
- Matched a hand-computed textbook problem across 75 unit tests and 5 end-to-end runs

Personal Site: Nintendo DSi Interface **May 2026 – Present**

issac-ip.com/dsi | github.com/issac-23/portfolio | *TypeScript*, *Next.js*, *Playwright*

- Traced a production-only font-swap defect, kept layout shift under 0.01, and added a Playwright test
- Integrated live Spotify data, refreshed every 30 seconds, through the Spotify Web API

Oasis: Course Community Platform **Sep 2026 – Present**

Spring Boot, *PostgreSQL*, *Next.js*, *OpenAI API*

- Building a Northeastern course community platform with anonymous posting and AI moderation
